

09 Early years practice policy

09.9 Prime times – Intimate care and nappy changing

Prime times of the day make the very best of routine opportunities to promote 'tuning-in' to the child emotionally and to create opportunities for learning. Nappy changing times are key times in the day for being close and promoting security as well as for communication, exploration and learning.

Young children, intimate care and toileting

- Young children are usually changed within sight or hearing of other staff whilst maintaining their dignity and privacy at all times
- Wherever possible, key persons undertake changing their key children.
- Parents provide nappies, pull-ups and wipes.
- Changing areas are warm, appropriately sited and there are safe areas to lay young children if they need to have their bottoms cleaned.
- If children refuse to lie down for nappy change, they can be changed whilst standing up, providing it is still possible to clean them effectively.
- Key persons ensure that nappy changing is relaxed and a time to promote independence in young children.
- Young children are encouraged to take an interest in using the toilet; they may just want to sit on it.
- They are encouraged to wash their hands and have soap and paper towels to hand.
- Key persons are gentle when changing and avoid pulling faces and making negative comment about the nappy contents.
- Wipes or cotton wool and water are used to clean the child. Where cultural practices involve children being washed and dried with towels, staff aim to make reasonable adjustments to achieve the desired results in consultation with the child's parents. Where this is not possible it is explained to parents the reasons why. The use of wipes or cotton wool and water achieves the same outcome whilst reducing the risk of cross infection from items such as towels that are not 'single use' or disposable.
- Key persons do not make inappropriate comments about young children's genitals when changing their nappies.

- Sometimes a child may have a sore bottom. This may have happened at home as a result of poor care; or the child may have eaten something that, when passed, created some soreness. The child also may be allergic to a product being used. This must be noted and discussed with the parent and a plan devised and agreed to help heal the soreness. This may include use of nappy cream or leaving the child without a nappy in some circumstances. If a medicated nappy cream such as Sudocrem is used, this must be recorded as per procedure 04.2 Administration of medicine.
- Older children use the toilet when needed and are encouraged to be independent.
- Members of staff do not wipe older children's bottoms unless there is a need, or unless the child has asked.
- Key persons are responsible for changing where possible.
- Parents are encouraged to provide enough changes of clothes for 'accidents when children are potty training.
- If young children are left in wet or soiled nappies/pull-ups in the setting, this may constitute neglect and will be a disciplinary matter.

Nappy changing is always done in an appropriate/designated area. Children are not changed in play areas or next to snack tables.
